---

## SUMMARY

I am a senior SDET focused on automation for fintech, payment systems, and product engineering teams that cannot afford weak release confidence.

My strongest scope is backend and API automation, with hands-on coverage across web, Android, and iOS, plus quality practices that hold up inside CI/CD.

## CORE EXPERTISE

### Automation and quality

SDET

QA Automation

API Testing

Backend Testing

Web Testing

Mobile Test Automation

Android Test Automation

iOS Test Automation

### Stack and tooling

Java

Kotlin

TypeScript

REST Assured

Selenium

Spring Boot

Docker

Jenkins

### Delivery and collaboration

CI/CD

Quality Engineering

Regression Coverage

Test Frameworks

Cross-functional Delivery

Mentoring

### Domain and languages

Fintech

Payment Systems

Banking Products

HoReCa

Russian - Native

English - Elementary working communication, reads technical documentation

## EXPERIENCE

### Senior Software Engineer in Test / SDET

Apr 2024 - Present

Serbia - Remote

#### Dasend

Drive test automation and quality assurance for a fintech product environment. Build and maintain automated test coverage for backend, API, and key product workflows. Collaborate with engineering and product teams to improve release confidence and delivery quality. Contribute to sustainable QA practices, CI/CD integration, and reliable regression coverage.

- Backend and API automation for release-critical workflows.
- Regression confidence aligned with CI/CD delivery.
- Cross-functional collaboration with engineering and product teams.

---

### Senior Software Development Engineer in Test

Feb 2019 - Apr 2024

Moscow City, Russia - Remote

#### Qiwi

Led QA specialists across multiple teams and drove test automation strategy for fintech and payment products. Designed and maintained automated test frameworks for backend services, APIs, web flows, and payment-related systems. Integrated automated checks into CI/CD pipelines to improve release confidence and reduce manual regression effort. Collaborated with developers, analysts, and product teams to improve test coverage, defect prevention, and delivery reliability. Mentored QA engineers in automation, test design, tooling, and quality practices.

- QA leadership across multiple teams.
- Automation strategy for backend, API, web, and payment flows.
- Mentoring and practical quality standards for QA engineers.

---

### Senior Software Engineer in Test

Sep 2018 - Feb 2019

Moscow, Russia - On-site

#### Home Credit Bank

Focused on mobile test automation for banking products across Android and iOS devices. Built and maintained automated coverage for mobile application flows, backend/API integrations, and key customer scenarios. Collaborated with QA, development, and product teams to improve release confidence for mobile banking releases.

- Android and iOS mobile automation.
- Coverage for mobile flows and backend/API integrations.
- Release confidence for mobile banking deliveries.

## **Android QA Lead / QA Automation Engineer**

Jan 2018 - Sep 2018

Voronezh, Russia - On-site

### **UCS**

Led Android test automation and quality activities for r\_keeper, a HoReCa product ecosystem used in restaurant and hospitality operations. Coordinated testing activities, improved automated coverage, and supported release quality for business-critical mobile workflows. Worked closely with product and engineering teams to identify risks, validate fixes, and improve delivery reliability.

- Android test automation leadership for r\_keeper mobile workflows.
- Quality support for HoReCa product releases.
- Risk-focused collaboration with engineering and product teams.

### **EARLIER EXPERIENCE**

- Quality Assurance Automation Engineer - Antera (Jan 2017 - Jan 2018)
- Software Engineer - T1 Consulting (Jan 2015 - Jan 2017)
- Web Developer - Uz-DaewooAuto (Apr 2014 - Jan 2015)

### **EDUCATION AND CERTIFICATION**

- **Voronezh State Technical University** - Engineer - Aircraft and Helicopter Engineering
- **Oracle Certified Associate** - Java SE 8 Programmer - November 2016
